

Lead Outreach Report — 17 Contacts

May 2026

01. Rohan Desai

Title: Engineering Manager

Company: Slintel

Location: Bengaluru, India

Department: Engineering

Industry: B2B SaaS / Sales Intelligence

Company Size: 51–200 employees

Email: rohan.desai@slintel.com

LinkedIn: linkedin.com/in/rohan-desai-slintel

Notes: Initial email was opened within hours of sending but received no reply. Sent a follow-up three days later referencing a technical post on their engineering blog. Rohan responded asking how quickly we could source senior backend engineers with Python and Kafka experience. A call was scheduled for the following Wednesday and he attended on time. He mentioned the team is scaling aggressively but headcount approval is still pending with the CFO. He requested a one-page overview of our sourcing methodology, which was sent the same evening. No response since, though the email was opened twice.

02. Isabelle Fontaine

Title: Talent Acquisition Manager

Company: Pipefy

Location: Curitiba, Brazil

Department: HR / Talent Acquisition

Industry: SaaS / Business Process Management

Company Size: 201–500 employees

Email: isabelle.fontaine@pipefy.com

LinkedIn: linkedin.com/in/isabelle-fontaine-pipefy

Notes: Cold email sent Monday morning, opened within two hours but no reply came. A second email the following week with a revised subject line received no open at all. Reached out on LinkedIn referencing a shared connection in the HR tech space — the connection request was accepted but the message went unanswered. Called the main office number and was told Isabelle was on leave for two weeks. Reminder set to follow up once she returns.

03. Callum Fraser

Title: Head of Talent

Company: Maze

Location: San Francisco, CA, USA

Department: People Operations

Industry: SaaS / UX Research Tools

Company Size: 51–200 employees

Email: callum.fraser@maze.co

LinkedIn: [linkedin.com/in/callum-fraser-maze](https://www.linkedin.com/in/callum-fraser-maze)

Notes: Replied to the first cold email within 24 hours, which was unexpected given the volume of our outreach batch. He confirmed Maze is actively searching for two senior product designers and one UX researcher. A 20-minute discovery call covered their hiring timeline and the candidate types they have struggled to find through job boards. He asked about contingency versus retained models — we explained both and he said contingency fits their current stage. Sample candidate profiles were sent and he replied saying he would share them internally. Last contact was approximately ten days ago.

04. Ayesha Qureshi

Title: Technical Recruiting Lead

Company: Darwinbox

Location: Hyderabad, India

Department: HR Technology

Industry: HRTech / SaaS

Company Size: 501–1000 employees

Email: ayesha.qureshi@darwinbox.com

LinkedIn: [linkedin.com/in/ayesha-qureshi-darwinbox](https://www.linkedin.com/in/ayesha-qureshi-darwinbox)

Notes: Outreach email was opened three times over two days with no reply. Follow-up included a personalized note referencing their recent Series D and growth announcements. Ayesha replied acknowledging the context but noted they already have two preferred staffing vendors and are not currently looking to expand that list. She mentioned vendor reviews happen annually in October and suggested we get back in touch then. Marked for follow-up in September to get ahead of that window.

05. Diego Almeida

Title: Engineering Manager – Platform

Company: Nuvemshop

Location: Buenos Aires, Argentina

Department: Platform Engineering

Industry: E-Commerce SaaS / SMB

Company Size: 201–500 employees

Email: diego.almeida@nuvemshop.com

LinkedIn: [linkedin.com/in/diego-almeida-nuvemshop](https://www.linkedin.com/in/diego-almeida-nuvemshop)

Notes: No response to the first two emails. A third email sent two weeks later focused on infrastructure hiring challenges specific to LATAM markets and received a reply the same day. Diego said they have been struggling to hire infrastructure engineers for over three months. He asked whether we could manage simultaneous sourcing in Argentina and Mexico. An intro call was held and he confirmed budget was not a constraint but that their internal HR team would need to approve the vendor contract. He agreed to connect us with the HR operations lead to move forward.

06. Chinwe Eze

Title: Talent Partner

Company: Andela

Location: Lagos, Nigeria
Department: Talent Operations
Industry: Tech Talent Marketplace
Company Size: 1001–5000 employees
Email: chinwe.eze@andela.com
LinkedIn: linkedin.com/in/chinwe-eze-andela

Notes: Reached out via LinkedIn before sending an email — the connection request was accepted but the InMail was not read. A cold email sent a few days later was opened once. Called the careers page contact number and reached a receptionist who said unsolicited vendor calls are not accepted. Sent a final targeted email with a subject line referencing their current open engineering roles. That email was opened twice and Chinwe replied a week later saying she would place our contact details on file. No further action since — moved to low-touch nurture queue.

07. Erik Bjornsson

Title: CTO and Hiring Manager
Company: Learnifier
Location: Stockholm, Sweden
Department: Engineering / Leadership
Industry: EdTech / LMS SaaS
Company Size: 11–50 employees
Email: erik.bjornsson@learnifier.com
LinkedIn: linkedin.com/in/erik-bjornsson-learnifier

Notes: Email was opened immediately and again two hours later. Erik replied that same evening asking whether we had experience placing developers in Nordic markets. A 30-minute call was held two days later. He explained that as a small team he handles all technical hiring personally because they cannot justify a dedicated recruiter. He was transparent about budget constraints and said they could offer competitive salaries but not placement fees exceeding 12 percent. We discussed the structure and he seemed comfortable. He said he would share open role descriptions by end of week — those arrived and sourcing has begun. Active engagement.

08. Ritika Menon

Title: People Operations Lead
Company: Exotel
Location: Bengaluru, India
Department: People & Culture
Industry: Cloud Communications SaaS
Company Size: 201–500 employees
Email: ritika.menon@exotel.com
LinkedIn: linkedin.com/in/ritika-menon-exotel

Notes: First email went unanswered. A second email sent seven days later received a reply from Ritika explaining that timing was difficult as the company had just completed a round of layoffs and hiring was paused. She was polite and asked us to check back in Q3 once things had stabilized. A brief acknowledgment was sent

and a follow-up was scheduled for July.

09. Lukas Bauer

Title: VP of Engineering

Company: Beekeeper

Location: Zurich, Switzerland

Department: Engineering

Industry: Frontline Workforce SaaS

Company Size: 201–500 employees

Email: lukas.bauer@beekeeper.io

LinkedIn: linkedin.com/in/lukas-bauer-beekeeper

Notes: Connected on LinkedIn after he commented on a post about scaling engineering teams. A DM referencing the post led him to ask what kind of profiles we specialize in. After explaining our focus on backend and infrastructure, he said they have been trying to hire two senior Kotlin developers for over two months. A call was arranged — he arrived five minutes late but stayed engaged throughout. He expressed frustration with job boards and said referrals had dried up. Two sample profiles were sent and the email was opened the same day. No reply yet.

10. Priya Subramaniam

Title: Senior Talent Acquisition Specialist

Company: Whatfix

Location: Bengaluru, India

Department: Talent Acquisition

Industry: Digital Adoption SaaS

Company Size: 501–1000 employees

Email: priya.subramaniam@whatfix.com

LinkedIn: linkedin.com/in/priya-subramaniam-whatfix

Notes: Referred to us by a contact in the Bengaluru SaaS network. Outreach mentioning the referral received a warm reply and she said she was already familiar with our name. The conversation quickly moved to specific roles: two data engineers and a senior product manager. She flagged a poor experience with a previous vendor who sent unqualified profiles. We offered a free shortlist of five candidates to demonstrate quality. She agreed and we delivered within a week. Two of the five were flagged as strong and moved to the interview stage. Currently in active conversation.

11. Maximilian Huber

Title: Technical Hiring Manager

Company: Testbirds

Location: Munich, Germany

Department: QA Engineering

Industry: Crowdttesting / QA SaaS

Company Size: 51–200 employees

Email: maximilian.huber@testbirds.com

LinkedIn: [linkedin.com/in/maximilian-huber-testbirds](https://www.linkedin.com/in/maximilian-huber-testbirds)

Notes: Initial cold email opened but no reply. Waited ten days before following up. Second email got a reply — he said they were mid-restructure of the QA team and timing was off. He asked to be contacted again in six to eight weeks. A short acknowledgment was sent and a reminder was scheduled. When we followed up, the email bounced — his address appears to have changed following the internal reorganization. Currently attempting to locate his updated contact via LinkedIn.

12. Nadia Al-Rashid

Title: Talent Acquisition Lead

Company: Foodics

Location: Riyadh, Saudi Arabia

Department: HR / Talent

Industry: Restaurant Tech SaaS

Company Size: 201–500 employees

Email: nadia.alrashid@foodics.com

LinkedIn: [linkedin.com/in/nadia-alrashid-foodics](https://www.linkedin.com/in/nadia-alrashid-foodics)

Notes: Opened the first email within a few hours and replied the next morning. She confirmed Foodics is expanding heavily across the MENA region and has roughly 15 open engineering and product roles. She asked specifically about our ability to source Arabic-speaking candidates with SaaS backgrounds. A 25-minute call was scheduled and held without rescheduling. She shared their typical interview process and noted that final decisions on senior roles involve the CEO directly. A capability overview deck was sent and acknowledged. She is reviewing internally before sharing the full JD list.

13. Brian Otieno

Title: Engineering Manager

Company: Copia Global

Location: Nairobi, Kenya

Department: Software Engineering

Industry: E-Commerce / AgriTech

Company Size: 51–200 employees

Email: brian.otieno@copiaglobal.com

LinkedIn: [linkedin.com/in/brian-otieno-copia](https://www.linkedin.com/in/brian-otieno-copia)

Notes: Email referenced their rural e-commerce expansion and the engineering complexity it introduces. No reply for eight days. A LinkedIn message was sent — he viewed the profile but did not respond. Called once and reached him directly but he said he only had two minutes and asked us to email instead. A concise two-paragraph email was sent as requested. He opened it but no reply came. One final outreach attempt planned before removing from active list.

14. Hui Ling Chua

Title: Head of People

Company: Sleek

Location: Singapore

Department: People & HR
Industry: SMB Business Services SaaS
Company Size: 51–200 employees
Email: huiling.chua@sleek.com
LinkedIn: [linkedin.com/in/huiling-chua-sleek](https://www.linkedin.com/in/huiling-chua-sleek)

Notes: Email opened twice on the day it was sent with no immediate reply. Hui Ling replied four days later after a second email. She mentioned they had recently built an internal TA team and were reducing reliance on external agencies, but acknowledged that specialized tech roles still sometimes require external partners. She asked for examples of roles successfully filled in Singapore, which we provided. She replied saying one case study was directly relevant to a senior DevOps engineer role they are currently struggling to fill. Exploring a trial engagement.

15. Bruno Carvalho

Title: Director of Engineering
Company: ContaAzul
Location: Joinville, Brazil
Department: Product & Engineering
Industry: Accounting SaaS for SMBs
Company Size: 201–500 employees
Email: bruno.carvalho@contaazul.com
LinkedIn: [linkedin.com/in/bruno-carvalho-contaazul](https://www.linkedin.com/in/bruno-carvalho-contaazul)

Notes: Cold email was not opened for the first ten days. After a LinkedIn connection request was accepted and a short message sent, he went back and opened the original email. He replied saying he appreciated the outreach but that all recruiting is handled internally and they rarely engage external vendors. He added that if this changed he would reach out directly. Marked as low priority but not fully disqualified — will send a value-add newsletter quarterly to stay on his radar.

16. Deepa Krishnan

Title: Senior Recruiter – Tech
Company: Chargebee
Location: Chennai, India
Department: Talent Acquisition
Industry: Subscription Billing SaaS
Company Size: 501–1000 employees
Email: deepa.krishnan@chargebee.com
LinkedIn: [linkedin.com/in/deepa-krishnan-chargebee](https://www.linkedin.com/in/deepa-krishnan-chargebee)

Notes: Replied to the first cold email asking for details on our candidate pool for engineering roles. She mentioned they are simultaneously hiring across backend, frontend, and data engineering and feeling stretched on sourcing. A 15-minute alignment call was held — she was direct about needing fast turnaround and asked whether we could guarantee profiles within five business days. We explained our typical timeline and she said she would discuss internally. Called again a week later and she said the decision was still pending due to a recent leadership change. Follow-up email sent, not yet replied to.

17. Patrick Cruz

Title: Talent Acquisition Specialist

Company: Xendit

Location: Jakarta, Indonesia

Department: Talent Acquisition

Industry: Payments Infrastructure / FinTech

Company Size: 501–1000 employees

Email: patrick.cruz@xendit.co

LinkedIn: [linkedin.com/in/patrick-cruz-xendit](https://www.linkedin.com/in/patrick-cruz-xendit)

Notes: No opens on the first two emails. Third email with a specific subject referencing their open roles on LinkedIn generated a reply the same day. Patrick confirmed they are actively filling infrastructure and security engineering roles across Indonesia and the Philippines. A call was arranged and he unexpectedly brought in a hiring manager from the security team. The conversation was productive and detailed — they described a six to eight week timeline to fill two roles. Pricing was discussed briefly and he said he would need to run it through finance. A follow-up summary email was sent and acknowledged.
